

# Proudly Local Our People Your Budget Joint Solutions

At SYFT Solutions, we manufacture high-performance screen panels designed to fit seamlessly into your existing Rotex units reducing downtime, maintenance, and cost. Proudly local. Built to last.

## OUR MISSION

At SYFT Solutions, our mission is to deliver client-focused solutions that offer the optimal balance of performance, service, and cost. We are committed to helping our clients achieve greater productivity while addressing industry challenges such as cost-per-ton reduction and maintenance budget optimization. Our goal is to establish SYFT Solutions as a trusted partner that supports the sustainable growth and profitability of mining operations.

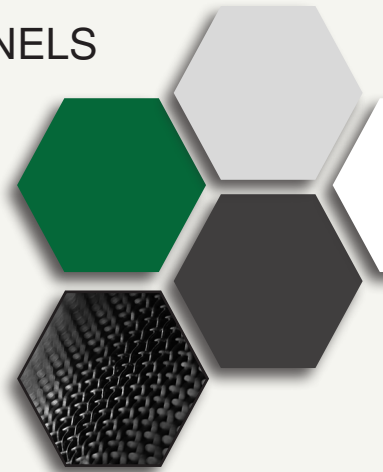

## OUR VISION

To be the leading provider of high-performance industrial screens in North America—setting a new standard for durability, reliability, and operational efficiency in the mining industry. We envision a future where every mine operates at peak productivity with fewer shutdowns, longer-lasting equipment, and trusted partnerships built on innovation and results.

## SYFT SCREEN PANELS

SYFT Screen Panels are precision-engineered as drop-in replacements for ROTEX Mineral Separator units.

Our screen panels offer the same fit, form, and function—without the OEM price tag.

## SYFTX SCREEN MESH

SYFTX wear resistant screen mesh utilizes a novel diffusion hardening process which achieves exceptional surface hardness and wear resistance compared to standard stainless steels while maintaining a ductile core.
