

# SYFT Bulk Wire Mesh

## PRODUCT OVERVIEW

### SYFT Bulk Wire Mesh - Overview

At SYFT Solutions, we are your **local bulk wire mesh provider** in virtually **any material, mesh size, wire diameter, and custom widths or roll lengths** to suit your process. Whether you're an industrial plant maintaining your own screening equipment or a fabrication shop building screens for your customers, SYFT can supply the bulk mesh you need—quickly and reliably.

#### TECHNICAL SPECIFICATIONS

Material | Sizing

Mesh Range:	2 - 500 Tyler Mesh
Wire Diameter:	Any (provided upon request)
Materials:	304 SS, 316 SS, Mild Steel (other alloys upon request)
Roll Width:	Up to 72" Standard
Roll Length:	100 ft Standard (Custom and larger lengths available)

#### TYPICAL APPLICATIONS

Product Fit | Function

- Re-screening of existing vibrating and rotary deck frames
- Fabrication of new screen panels and inserts
- Grizzly, hand-tensioned, and simple screening systems
- Protective guards, safety screens, and enclosures
- Sifters, classifiers, and separators

## Stocking and Logistics

On Time | On Budget

SYFT Solutions offers Western Canada-based inventory and support, helping reduce lead times and simplify logistics for industrial plants and distributors.

### Custom Stocking Programs:

For high-usage meshes, SYFT can work with you to develop stocking programs, including:

- Holding safety stock of your most common meshes and widths
- Aligning inventory with your typical consumption and outage schedules

### Lead Times & Sourcing

- Bulk mesh is sourced through a proven supply network
- Short lead times and responsive quoting

## The SYFT Advantage

Bulk Wire Mesh

### Local to Western Canada

- Faster communication and regional understanding vs. distant or overseas brokers

### Screening & Process Expertise

- Real industrial screening experience and a partner who understands how mesh performs in potash, aggregates, chemicals, food, and more

### Competitive, Industry-Leading Pricing

- Designed for distributors and industrial end users who need value, not inflated OEM markups

### Customization & Flexibility

- Non-standard meshes, odd widths, custom cut sizes
- Local Inventory and customer specific stock
