

# SYFT Screen Panels

## PRODUCT OVERVIEW

PREMIUM PERFORMANCE | AFFORDABLE PRICE

### THE PROBLEM

High Cost | Limited Options

In high-capacity industrial screening operations—particularly within mining, fertilizer, and energy industries—equipment downtime, high screen panel replacement costs, and foreign supply of OEM screen panels can create major inefficiencies and inflate costs.

Operators using **ROTEX® Mineral Separator** units often face:

- Limited supply chain options for replacement screen panels
- High unit costs from OEM screen panels
- Limited options for customization

### THE SOLUTION

Affordable | Local Supply

SYFT 304SS Screen Panels are precision-engineered as drop-in aftermarket replacements for ROTEX® Mineral Separator units.

**SYFT screen panels offer the same fit, form, and function—without the OEM price tag.**

- **A cost effective alternative to the OEM**
- Standard dimensions: 48" x 89 7/8"
- Compatible with ROTEX® Mineral Separator models
- Standard Mesh sizes: 2 to 30 mesh (Tyler)
- Standard and high-temp-resistant models
- Includes standard grommet locations and header plates for pre-tensioning

# SYFT Screen Panels

## THE VALUE

Lower Cost | Local Inventory

SYFT panels provide OEM performance at a more economical price, helping you reduce maintenance costs while avoiding downtime.

- Direct savings through lower unit pricing
- Short lead times—most sizes stocked
- Zero retrofitting—drop-in compatibility ensures fast changeouts
- Customization flexibility for mesh size, wire diameter, and material (e.g., 316SS or hardened mesh available)

Whether you're running batch processing or continuous throughput, SYFT's 304SS screen panels deliver reliable screening performance while improving procurement efficiency.

SYFT Solutions has stocking capacity for immediate delivery from our Alberta warehouse, with custom mesh and wire combinations available on request.
